Meeting of Hygiene and Comfort Hygiene Comes From Boron Minerals

Borjen presents you the hygiene and comfort that are one of the most important building blocks of a healthy sleep. Our national mines which are used in Borjen mattress have 73% of the world's boron reserves. Along with the discovery of boron 4000 years ago Boron, which is began to use in aim of manufacturing medicine and providing sanitation in thousand years, currently it has been using in various industries, such as space technology, glass industry, defence industry and energy sector.

Immaculate Sleep Experience

Millions of microorganisms, such as bacteria and mites live on items that we use daily. Your bed which you sleep hours and hours on it included. As this small creatures threaten human health, they trigger many diseases just as allergic reactions, and bronchitis. BORJEN mattress is developed by taking the advantages of hygienic structure of Boron mines, it also provides a hygienic and a healthy sleep by decreasing health risks.

Special Fabric with Blend of Boron Minerals

Fabric of Borjen mattress is covered with BORON minerals by processing special and technologic procedures. Through boron minerals are on the upper surface, they hinder malodour and the development of bacteria, mites and other microorganisms as well. In addition to hygienic sleep, mattress fabric has a soft touch and provides a sleep comfort at the maximum level.

BORON MINERALS BLENDED SPECIAL FOAM

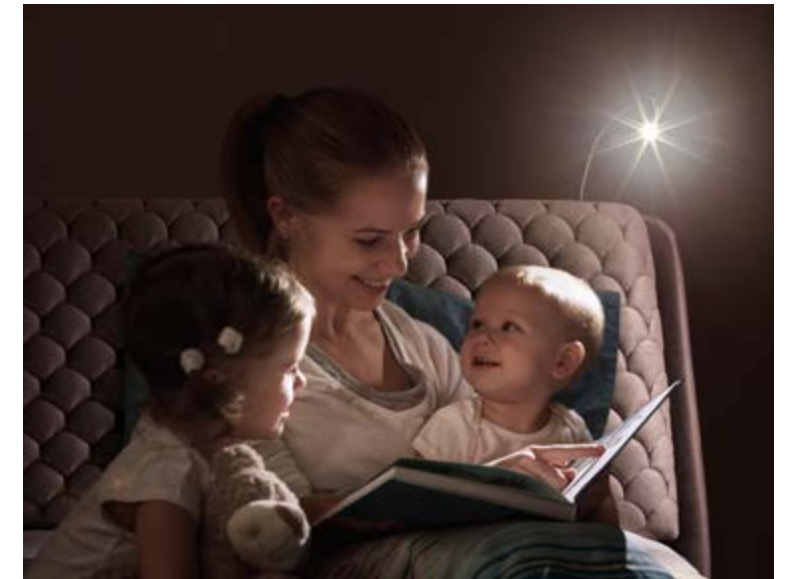

While sleeping, body wants to rest at maximum level, metabolism slow downs, and defense system of body weakens. BORON mines are underwent a process both in Hyper Soft Extra Comfort Foam and in spine support foam of BORJEN mattress, after that obtained minerals are applied by sensitive and high special technologic processes, by this way minerals help to protect your health in your most vulnerable times. It supports a hygienic and a quality sleep environment that you deserve by its technology preventing the increase of bacteria, mites and the other microorganisms.

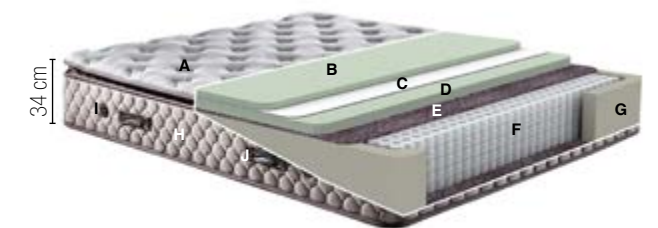

HEADBOARD WITH NIGHT LIGHT AND USB CHARGE

On the contrary of ordinary pattern designs, Borjen has a brilliant details, also modern, and soft appearance, besides it will mesmerize you with its extraordinary fabric designs. While we are thinking of aesthetic designs, of course we don't forget your comfort. Night lights right above the headboard ensure you to read a book, study, work and have enjoy on the bed without disturb or interrupt your comfort. Furthermore, you can charge your phone or tablets with the usb input right above the headboard.

Velvet Effect HyperSoft Foam

HyperSoft Extra Comfort Foam engages with that technology and helps mattress to take shape of your body by supporting the body curves. The special foam texture that causes to feel this softness on each touch, and the back support mechanism that you can adjust with a single touch will bring your dream comfort to your bed.

Motion Comfort Pocket Spring

Another feature of Borjen mattress that protects your health and provides you to enjoy comfort at high level is Pocket Spring Technology. As the springs in your bed are placed so that they do not touch each other, your body pressure is distributed evenly in the bed without being collected at certain points. As it protects your spine health, it eases to start a day healthy and energetic thanks to this system. In addition, pocket spring which allows couples to move freely, positioned independently as not to touch each other.

HyperSoft Extra Comfort Foam engages with that technology and helps mattress to take shape of your body by supporting the body curves. The special foam texture that causes to feel this softness on each touch, and the back support mechanism that you can adjust with a single touch will bring your dream comfort to your bed.

MAGNASAND
T H E R A P Y

PRODUCT DEVELOPMENT AWARD

**ISTANBUL
MARKETING
AWARDS
2019**

Bambi wins the Gold Award in the "Product Development" category with Magnasand Therapy.

Bambi Yatak, which is one of the most important players in Turkey mattress market, gains the Gold Award of Istanbul Marketing Awards in the Product Development category with its Magnasand Therapy mattress that helps to decrease the stress of your body.

The Most Natural Way To Avoid Stress Magnetic Black Sand

Meet Magnasand Teraphy which engages you with the therapeutic miracle of mental and physical therapy.

The Magnasand Therapy mattress has magnetic black sand that ancient people have been healing for centuries. Although it was found in very few regions in the world, this healing sand that has roughly 20 minerals was discovered in secluded coasts of the Black Sea.

Magnetic Sand Blend Special Foam

The magnetic black sand is subject to different processes is mixed with the foam by a special technique. This foam in the comfort pad of the Magnasand Therapy mattress provides a magnetic field which helps to reduce the stress level in the body. In this way, it relieves your stress as well as providing a comfortable sleep.

Unlike other sands, the magnetic black sand comprised of the combination of mineral grains, also has effects that are regulating bio-energy and balancing life functions. During sleep it regulates the magnetic irregularity, which is increased due to the radiation of the technological devices, and tough conditions of the urban life you are exposed during the day; by allowing the magnetic waves to pass through the tissue. While your body gains strength against psychological disorders, such as stress, and depression, by dint of the activation of the body's repair mechanisms, it helps to repair the physical ailments caused by circulatory disorders.

Back Support Cushion With A Special Mechanism

Gain The Comfort By A Single Touch

The special sponge texture which has a soft effect on each contact and the back support mechanism that you can adjust with a single touch allows you to have a comfortable time in your bed, not only for sleep but also for anytime that you are on the bed.

Motion Comfort Pocket Spring

The Velvet Effect Hypersoft Foam

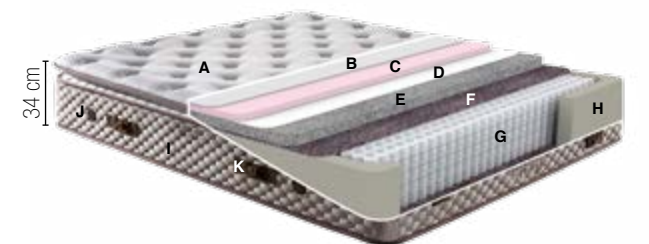

Another feature of Magnasand Therapy that makes it easy for you to start your day is Pocket Spring Technology. In this technology, since the springs in your bed are placed so that they do not touch each other, your body pressure is distributed evenly in the bed without being collected at certain points. This placement, which helps your spine shape to stay in the right position throughout the night, replaces a tired day that you wake up with body aches; leaves an energetic day that feeling rested. At the same time, the independent positions of the springs which allow the couples to exercise their freedom of movement during the sleep, provide you an uninterrupted sleep comfort.

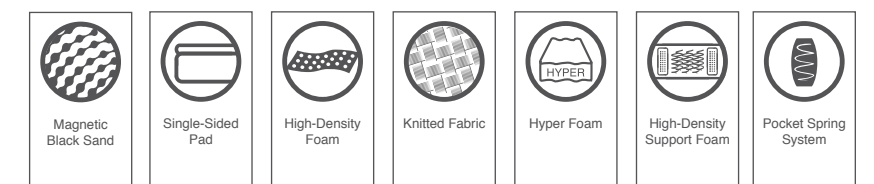

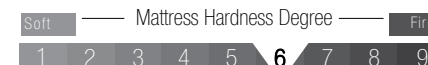

Hyper Soft Extra Comfort Foam lets the mattress to conform your body shape by supporting body curves. The special foam texture that causes to feel this softness on each touch, and the back support mechanism that you can adjust with a single touch will bring your dream comfort to your bed.

THERMO CONTROL

NEW PRODUCT

THERMO CONTROL FABRIC

Thermo Control fabrics have a feature that adjust the temperature of fabric according to external environment temperature. This feature works with PCM which is present on the structure of fabric. When body temperature increases, PCMs decrease the temperature and provide a cooling effect. As the body temperature decreases too much, it distributes the temperature which it keeps hidden on the fabric. Therefore, it provides a stable micro-climate around the fabric.

Cool Comfort

It enables you to have your comfort by regulating heatwaves. Besides, it has a double-sided temperature regulation function.

Skin Friendly

Thermo Control fabrics help to protect the ideal temperature of a body by regulating heatwaves. Thermo control fabric has an antistatic feature, and it can be washed. Ideal body temperature that is provided throughout the night, increases the comfort and sleep quality.

Velvet Effect
HyperSoft Foam

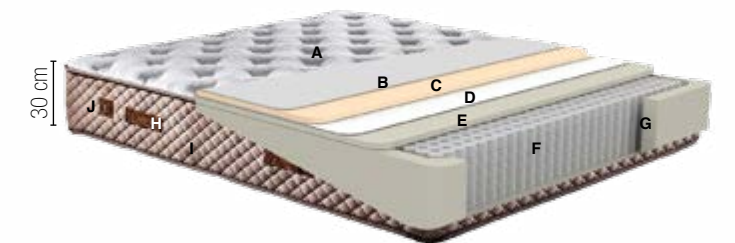

HyperSoft foam is special foam kind that is softer than feather and has a high flexibility. It helps mattress to take the shape of your body easily. It is aimed at providing a soft and velvet-like touch to your skin with HyperSoft foam that is used for quilting.

Motion Comfort
Pocket Spring System

The springs are placed into the mattress in independent pockets. Thus, it is provided noise insulation. Besides, independent moving springs help distribute the body pressure equally to the mattress. Keeping the spine shape in the right position provides a comfortable sleep. Couples are less affected by each other's movements during sleep.

Relax Mood

**NEW
PRODUCT**

Double-Sided Use of Mattress

The accurate mattress choice is one of the most important components for beginning the day in a gorgeous way. Hence, a mattress that keep your comfort level at maximum is pretty essential. The Research and Development Specialists of Bambi Yatak take this matter into consideration and produce a mattress for people that enjoy firm mattresses as well. Relax Mood mattress has a special high-density HR (High Resilient) foam. The hardness of the mattress' one surface is above the standard hardness, and the other surface has more extra hardness. Hardness choice differs from people to people, therefore you can enjoy comfortable sleeps by using the most accurate surface for you.

The Relax Mood mattress prevents excessive stress on the joints forming the spine by keeping the body in the ideal position during sleep. It also minimizes the pressure due to lying on the curvature of the body.

Velvet Effect HyperSoft Foam

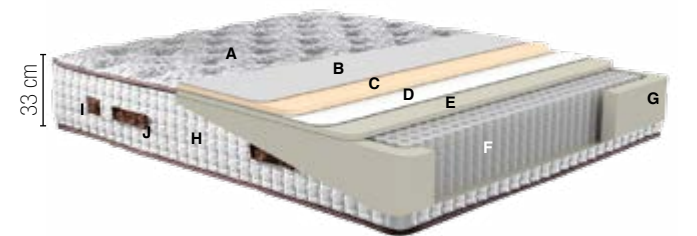

HyperSoft foam is special foam kind that is softer than feather and has a high flexibility. It helps mattress to take the shape of your body easily. It is aimed at providing a soft and velvet-like touch to your skin with HyperSoft foam that is used for quilting.

Motion Comfort Pocket Spring System

The springs are placed into the mattress in independent pockets. Thus, it is provided noise insulation. Besides, independent moving springs help distribute the body pressure equally to the mattress. BAMBOO

SLEEP

BAMBOO
SLEEP

**Organic And Hygienic
Bamboo Fibers**

Bamboo Sleep takes inspiration from Bamboo Tree which is the symbol of elegance and endurance, and it enables you to sink into a deep and natural sleep. The branches of this enchanting tree with the healing effect of the nature, meets you with the idyllic atmosphere that you desired in your bedroom, and bamboo fiber helps to evaporate the moisture on your body by absorbing it, as well as enabling your bed to breathe. By this way, it offers you more sleeping comfort.

**Velvet Effect
HyperSoft Foam**

HyperSoft Foam is a special type of sponge that is softer and has higher flexibility than the feather foam. It helps to get the shape of the body easily. The HyperSoft foam used in the quilting is intended to provide a soft touch to the skin and a velvety touch feel.

Kapok Life

Motion Comfort Pocket Spring System

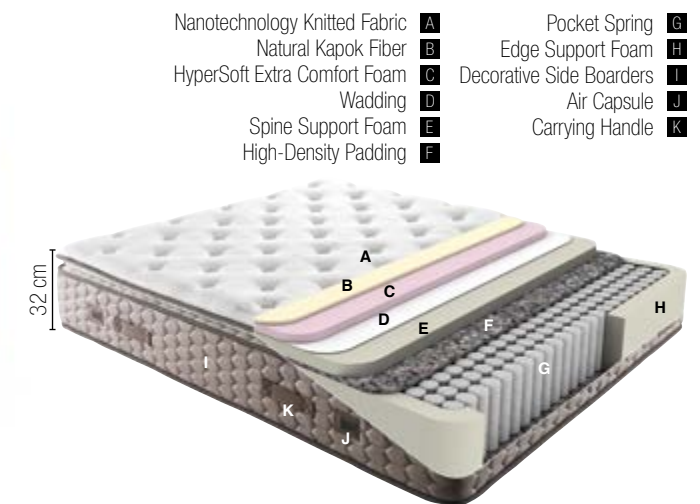

The springs are placed into the mattress in independent pockets and this technique provides noise insulation. In addition, independent moving springs help body to distribute the pressure equally to the mattress. Keeping the spine shape in the right position provides a comfortable sleep. Couples are less affected by each other's movements during sleep.

Velvet Effect HyperSoft Foam

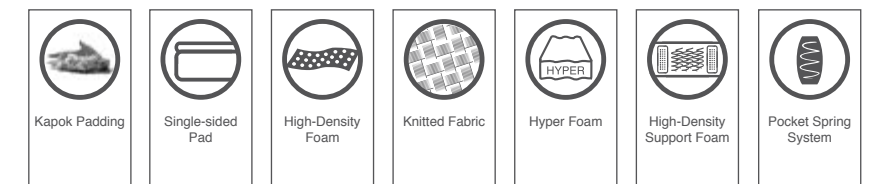

HyperSoft Foam is a special type of sponge that is softer and has higher flexibility than the feather foam. It helps to get the shape of the body easily. The HyperSoft foam used in the quilting is intended to provide a soft touch to the skin and a velvety touch feel.

Natural, Quality And Healthy Sleep Kapok Padding

Organic kapok fibers are obtained by natural ways from kapok wood which is a great heat keeper. Its non-wetting, moisture-repellent structure reduces the discomfort of the sweating and the wetness on the bed.

Memory Technology Visco Foam

Visco elastic sponge was developed to balance the pressure on the spine. This technology was discovered for astronauts by NASA. Formulated with body heat and weight, visco contributes to healthy blood circulation by supporting the spine perfectly.

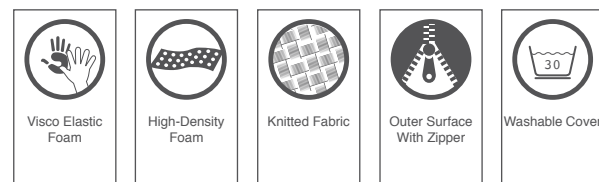

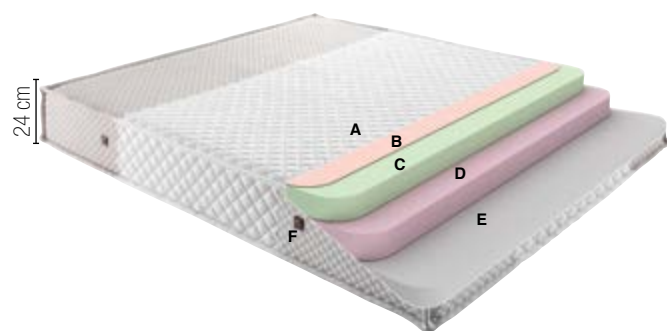

Innovation and quality are always priority in sleeping areas. Scientifically, we searched for the evolution of new sleep requirements with new materials, and new combinations. Visco Comfort is at your disposal to increase the quality of the rest, and at the same time comfort is provided by a high quality sleep.

Quiet As A Night HR Foam

HR Foam has high-density and high-resistance. Thanks to these properties, HR Foam which is used as a thick layer under Visco provides balanced distribution of body weight to the surface. It is the only foam structure that provides an ideal environment for a quiet sleep.

Motion Comfort
Pocket Spring System

The springs are placed into the mattress in independent pockets and this technique provides noise insulation. In addition, independent moving springs help body to distribute the pressure equally to the mattress. Keeping the spine shape in the right position provides a comfortable sleep. Couples are less affected by each other's movements during sleep.

A Soft Touch
Feather Foam

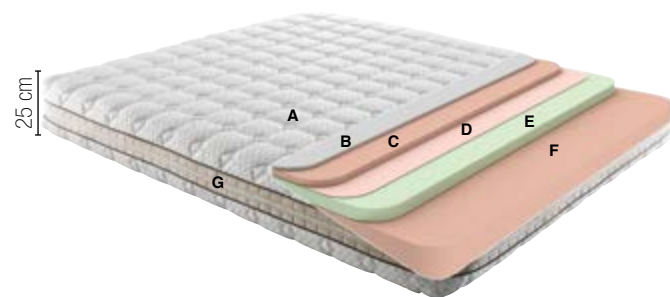

Feather foam is a pretty soft, and flexible special foam. It gives the body a soft touch. It forms a quilted soft texture with the feather foam.

Experience The Extra Comfort
Comfort Pad

The high-density foam in the pad is used in order to support the spine. Increase in the foam height improves the comfort. The pad layer, which is partially separated from the springs, gives a softer ground feel due to the thick foam. Your bed gives you both the durability of the spring and the comfort of the thick foam layer.

Long - Lasting Use
Double-Sided Use

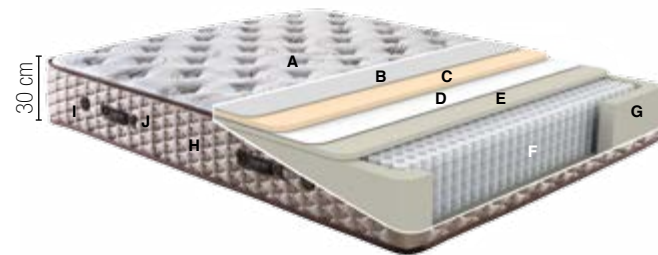

It is used same materials in both sides, thus it is provided the use of both sides of the mattress. In this way, it is aimed to use longer life by changing the bed direction. You will feel the comfort of sleeping in a new bed every time that you change the direction of your mattress.

Classic Sleep Comfort
Bonel Spring System

The feature of the system is that the spring coils are mechanically connected to each other by metal wires. The bonel spring windings are connected to each other by spiral-shaped wires. A heat-treated bonel spring system removes the collapse in the areas that body weight is mostly accumulated. It is ideal for people who enjoy sleeping on a hard or medium stiff ground.

Visco Topper

Visco-Elastic Foam, Knitted Fabric Memory Technology

Visco elastic sponge was developed to balance the pressure on the spine. This technology was discovered for astronauts by NASA. Formulated with body heat and weight, visco contributes to healthy blood circulation by supporting the spine perfectly.

Latex Topper

No More Fatigue LATEX Foam with 7 Zone

It is a natural, light and high-strength substance that is produced from rubber. By means of its spongy texture, it both provides air circulation, and it enables stabilized comfortable sleep by applying pressure on the body from the 7 different zone.

Special Inclined Baby Mattress

The muscle development of babies continues until the 6th month, therefore the stomach valve cannot do its duty and the stomach contents may flow back into the throat. Mini Bambi sorts out the problem thanks to its special incline, and it gives your baby a safer and more comfortable sleep.

Pure Breath APF / Air Permeable Fabric

Air Fabric's surface contacting the body is produced from 100% cotton, which has a high-absorption capacity, and it also balances the body temperature by carrying the temperature out of the body.

It is used an excellent knitting technique in air fabric to ensure you to obtain a quality and comfort sleep. With the cross weave system, it has a 3 dimensional flexibility, air-permeable, moisture regulating, and weight balancing structure. Thanks to special air-permeable fabric your mattress breathes, and it prevents the malodour by supplying air circulation even in your smallest movement. By means of this, your sleep comfort increases.

Immaculate Sleep Waterproof Removable Pad with Zipper

Different than the other mattresses, the pad on the mattress has a zipper, and it also can be removed and washed. It provides not only a relax and comfortable sleep but also a hygienic and healthy sleep.

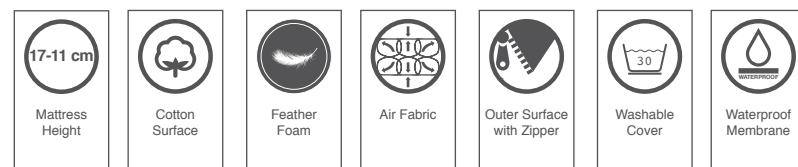

The membrane used under the pad extends the life of the mattress with its waterproof feature, and it blocks the unpleasant smell.

- Feather Comfort Foam **D**
- Zipper **E**
- Air Capsule **F**
- Carrying Handle **G**
- Decorative Side Borders **H**

purotex Allergy Control Technology

Probiotics, which are positioned in microcapsules, do not give any place on the mattress surface to microorganisms that cause diseases. It helps to prevent the occurrence of mould and fungus. It hinders the condensation of allergens which may lead to allergic reactions and asthma. It provides a permanent safe and natural hygienic environment through its daily renewed effect. It reduces the occurrence of stain and unpleasant smell.

Special Inclined Baby Mattress

Babies muscle development continues until the 6th month, therefore the stomach valve cannot do its duty and the stomach contents may flow back into the throat. Junior Bambi sorts out the problem thanks to its special incline, and it gives your baby a safer and more comfortable sleep.

More Durable Mattress Waterproof Membrane

The membrane used under the pad extends the life of the mattress with its waterproof feature, and it blocks the unpleasant smell.

Immaculate Sleep Removable Cover with Zipper

The inner layer of the mattress cover is coated with a special waterproof membrane. Therefore, the life of your mattress extends, also it hinders the occurrence of malodour and microorganisms.

- Waterproof Air Fabric **A**
- Elastic Lining **B**
- Siliconized Fiber **C**
- Feather Comfort Foam **D**
- Zipper **E**
- Carrying Handle **F**

When we take the bone development of babies and children into consideration as the one of the most important activities, and that they spend most of their time in the bed; a healthy sleep is quite important for them.

If your baby sleeps well and accurately, it will affect the growth of the baby positively. To ensure a baby to sleep peacefully; the room, which the baby sleeps in it, should be comfortable, quiet, not too light, ventilated daily. Besides it should be between 21-25 degrees Celsius, and the most important thing is to choose the right baby mattress. As your baby's bone development supported with the Magic Bambi baby mattress that produced by Bambi Yatak, thanks to its removable cover, it provides your baby a hygienic and a healthy sleep environment.

A Soft Touch Feather Foam

Feather foam has a very soft and flexible special structure. When the body contacts, it gives a soft touch.

More Durable Mattress Waterproof Membrane

The membrane used under the pad extends the life of the mattress with its waterproof feature, and it blocks the unpleasant smell.

Immaculate Sleep Removable Cover with Zipper

The inner layer of the mattress cover is coated with a special waterproof membrane. Therefore, the life of your mattress extends, also it hinders the occurrence of malodour and microorganisms.

The Colour Options

Choose the base and headboard colours as you wish

The bases and headboards lists that you can change it

- Royal Craft
- Latex Therapy
- Borjen
- Magnasand Therapy
- Relax Mood
- Thermo Control
- Latextra
- Visco Comfort
- Viscolux
- Kapok Life
- Cotton Master
- Diamond
- Nirvana Prime
- Clima Naturel Prime
- Infinity
- Sleepure
- Bamboo Sleep
- Serenity

* Regardless of price difference, you can choose any colour of the base and headboard, which its models are listed above, from the Bambi mattress fabric chart.
 ** The headboards with two-colour, such as Serenity, Cotton Master and Infinity are produced as single-colour.

Nesting Storage Bases

As you please, it is your choice!

The models that you can choose as nesting bases

- Royal Craft
- Latex Therapy
- Borjen
- Magnasand Therapy
- Thermo Control
- Latextra
- Viscolux
- Kapok Life
- Cotton Master
- Diamond
- Nirvana Prime
- Clima Naturel Prime
- Infinity
- Sleepure
- Bamboo Sleep
- Serenity

* Since the nesting bases have wide edges, you should order the headboard 10 cm larger than the base size.

MAGIC TOUCH SYSTEM

Save Your Energy!

Bambi Yatak produced the Magic Touch System, our common problem that is opening a mattress base hardly will be over with this system. Thanks to our new system bases are now opened easily with a single move, are used safely and closed comfortably.

- BORJEN
- MAGNASAND
- ROYAL CRAFT
- LATEXTHERAPY
- THERMO CONTROL
- NIRVANA
- VISCO LUX
